PBI1: Priority 1

As an election official I want to be able to enter a filename that does not exist and the election will let me try again So that all csv files can be properly imputed Note: We are interested in functionality and not the individual tasks for the PBI. Do not create tasks at this time
Acceptance Criteria (conditions that have to be fulfilled to ensure the story is complete) The bug no longer exists
Definition of Done (what is required by the team before sending out for review): BallotHandler is refactored, all unit testing must pass, the code runs efficiently, and necessary documentation is added.
Effort: Small
PBI Author: Ben

PBI2: Priority 2

As an election official I want to be able to run a Municipal Voting (MV) election So that it's possible to determine winners of elections using the MV algorithm when called for.
Acceptance Criteria When the CSV file indicates that an MV election shall be run, the voting system will correctly determine winners using the MV algorithm.
Definition of Done New election created which includes .cpp and .h, inherits from IElection, passes all unit tests, runs clean and efficient, and necessary documentation is added.
Effort: Medium
PBI Authors: Ben, Joe

PBI3: Priority 3: MV input file

As an election official I want to be able to use a CSV file with Municipal Voting (MV) election ballots in it So that I can run an MV election
Acceptance Criteria Voting system can handle the input of CSV files that include ballots cast in an MV election, such that all ballots are parsed and counted correctly.
Definition of Done

All unit testing must pass, BallotHandler is refactored, code runs efficiently, and necessary documentation is added.
Effort: Small
PBI Author: Joe

PBI4: Priority 4

As an election official I want to be able to bring all of the election information from the header of the .csv file So that the MV, STV, and Plurality elections can be run without any interaction, aside from entering file names.
Acceptance Criteria All elections run without interaction from the election official, aside from entering file names.
Definition of Done All unit testing must pass, BallotHandler is refactored, code runs efficiently, and necessary documentation is added.
Effort: Small
PBI Author: Joe

PBI5: Priority 5

As an election official I want to ensure all ballots are validated for an STV election So that 60% of candidates are ranked in each ballot
Acceptance Criteria (conditions that have to be fulfilled to ensure the story is complete) ● All ballots removed from the election due to ranking errors must be accounted for in a report, with each ballot listed - all STV ballots must have 60% of candidates ranked ● The report is called STVBallotErrorsxxxxxxxx with the date of the election replacing the x's (e.g. 02022025) ● The number of ballots is adjusted if ballots are removed.
Definition of Done (what is required by the team before sending out for review) All unit testing passes, code runs efficiently, and code is well documented.
Effort: Medium
PBI Author(s): Quang

PBI6: Priority 6

As an election official I want the MV stats displayed on the screen at the end of the election So that I can know who won and lost.
Acceptance Criteria The MV stats should be displayed to the user after the election has concluded. Specifically, how many votes each candidate received from voters, the type of election, the number of seats, the number of files, the number of ballots, the number of votes cast, the percentage of overall number of votes each candidates received based on the total number of 1s in all of the ballots, and the winner(s) of the election shall be displayed.
Definition of Done All unit testing must pass, code runs efficiently, and necessary documentation is added.
Effort: Small
PBI Author: Joe

PBI7: Priority 7

As an election official I want an audit report file generated at the end of a MV election So that the info from the election can be viewed
Acceptance Criteria When an MV election completes a file with the name MVElectionXXXX with the date of the election is created containing stats from the election
Definition of Done All unit tests pass, file is named correctly, all stats are correct and included, and necessary documentation is added.
Effort: Small
PBI Author: Ben

PBI8

As an election official I want to select files via a directory GUI So that I can click and select files and not type it in
Acceptance Criteria ● Allow CSV files to be selected by clicking instead of typing in file names ● Refactor BallotHandler to accept the CSV files this way
Definition of Done

All unit tests pass and the input files integrate with the system.
Effort: Medium
